Certificate Funding and Qualification Opportunities for Optometry

The Boosting Apprenticeship Commencement Government initiatives have recently confirmed that Certificate IV in Optical Dispensing has now been recognised as a qualification that is essential to attracting and retaining great staff in an essential industry. It has also been added to the BAC Federal and State funding eligibility.

ProVision is working with Government stakeholders and our training partners to confirm the significant state and federal funding details, and opportunities for additional financial incentives that may be available to our members. We are also researching if there are any other qualifications that we deem to be relevant for our members and their teams.
